# Who We Are ?

The heyday of meme investing is winding out. Because they only participate in meme consumption after everyone else and only when it is too late, may find it unprofitable given the quickly rising inflation.

The community surrounding meme coins is broken and divided, and many people are abandoning their initial, obsessive meme coin in search of greater chances with the potential to earn them millionaires. Consequently, if you invested in memes and didn't profit from it, you now have another opportunity to be first and early.

The goal is to create a humorous coin that average people could relate to, deviating from the overtly serious bitcoin investing story. Along with Bitcoin and Ethereum, RabbitKing is now regarded as one of the most well-known cryptocurrencies in use. Compared to the vast array of tokens that have developed along with the medium, its foundation has stayed unchanged.

It attempts to complement the original meme cryptocurrency and give it smart contract functionality. In the end, RabbitKing will give users access to blockchain games, NFTs, and the expanding DeFi ecosystem, where they can promote their preferred meme coin for a variety of uses.

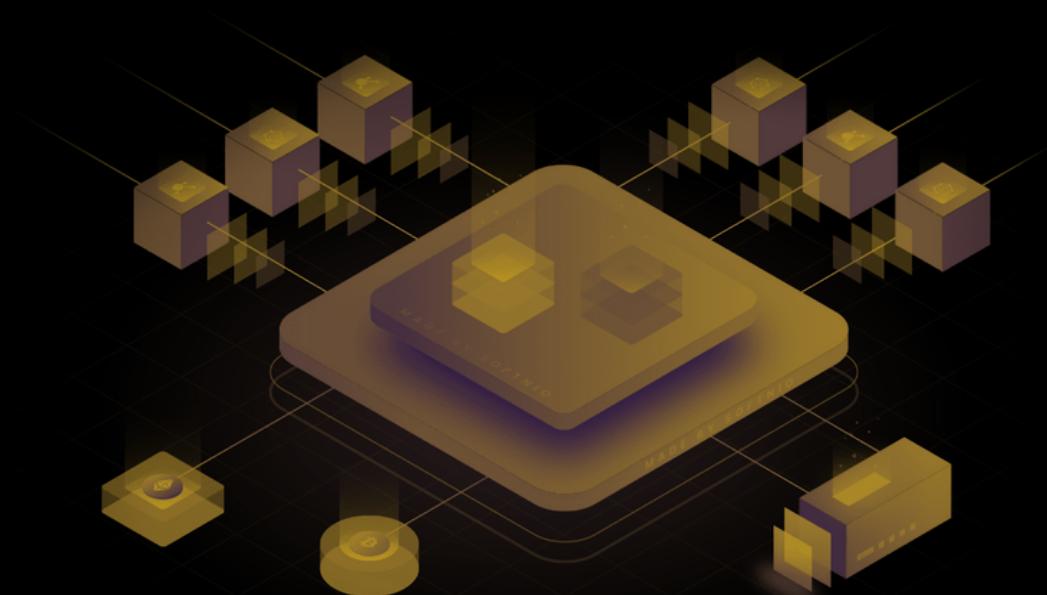

# Introduction

Most people believe that buying early meme currencies happens covertly, and that by the time you learn about it, it's too late. While other people have already achieved fortune, you remain unchanged. You encountered it on platforms like Dogecoin, Floki Inu, Shibby Inu, and many others.

You might not be aware that many individuals have lost a lot of money investing in different cryptocurrency projects in addition to the fact that meme coins make people rich. Large investments were made by some people, including their rent, savings, and means of subsistence, all of which were destroyed when the markets crashed. We tell you this story to scare you off of making that kind of investment.

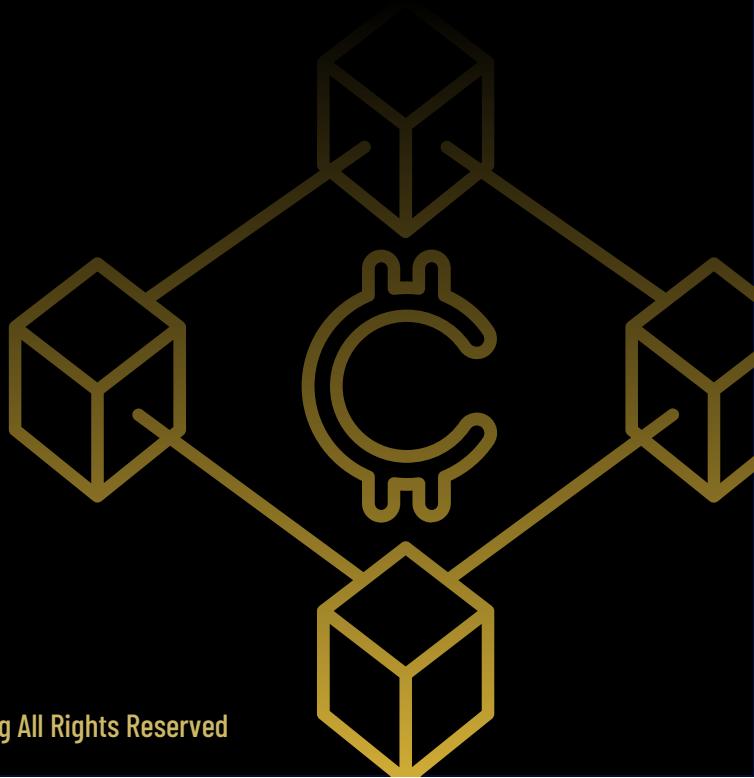

# About Us

Developed on the Binance Smart Chain, RabbitKing is a BEP-20 community token with a 6% transaction tax (buy and sell).

The circulation of RabbitKing is 100 trillion. 55.7% of RabbitKing is now burned. The community of RabbitKing has elected to transfer contract ownership to a dead address. For a year, liquidity is locked.

Token distribution based on Pos+Defi-based processes will be made entirely decentralised by RabbitKing innovation. RabbitKing does not offer private placement or public offering, participants are required to buy on the open market to ensure fair and complete distribution.

# Vision

With an eye on true innovation and a great enthusiasm for technological advancement, the RabbitKing team has laid the foundation for everyone to build upon in 2023.

They are aware that rather than the same imitation meme currencies of the past, investors today are looking for originality, talent, and transparency. They have heeded the call, and as they carry on changing their names, their community will instruct future generations.

Token distribution based on Pos+Defi-based processes will be made entirely decentralised by RabbitKing innovation

- Our developer community can create a blockchain network that better satisfies their requirements.
- Reuse the API and existing Ethereum smart contract technologies between networks.
- Offer Special Purposes.
- By adding Runtime, Ethereum smart contracts are expanded..

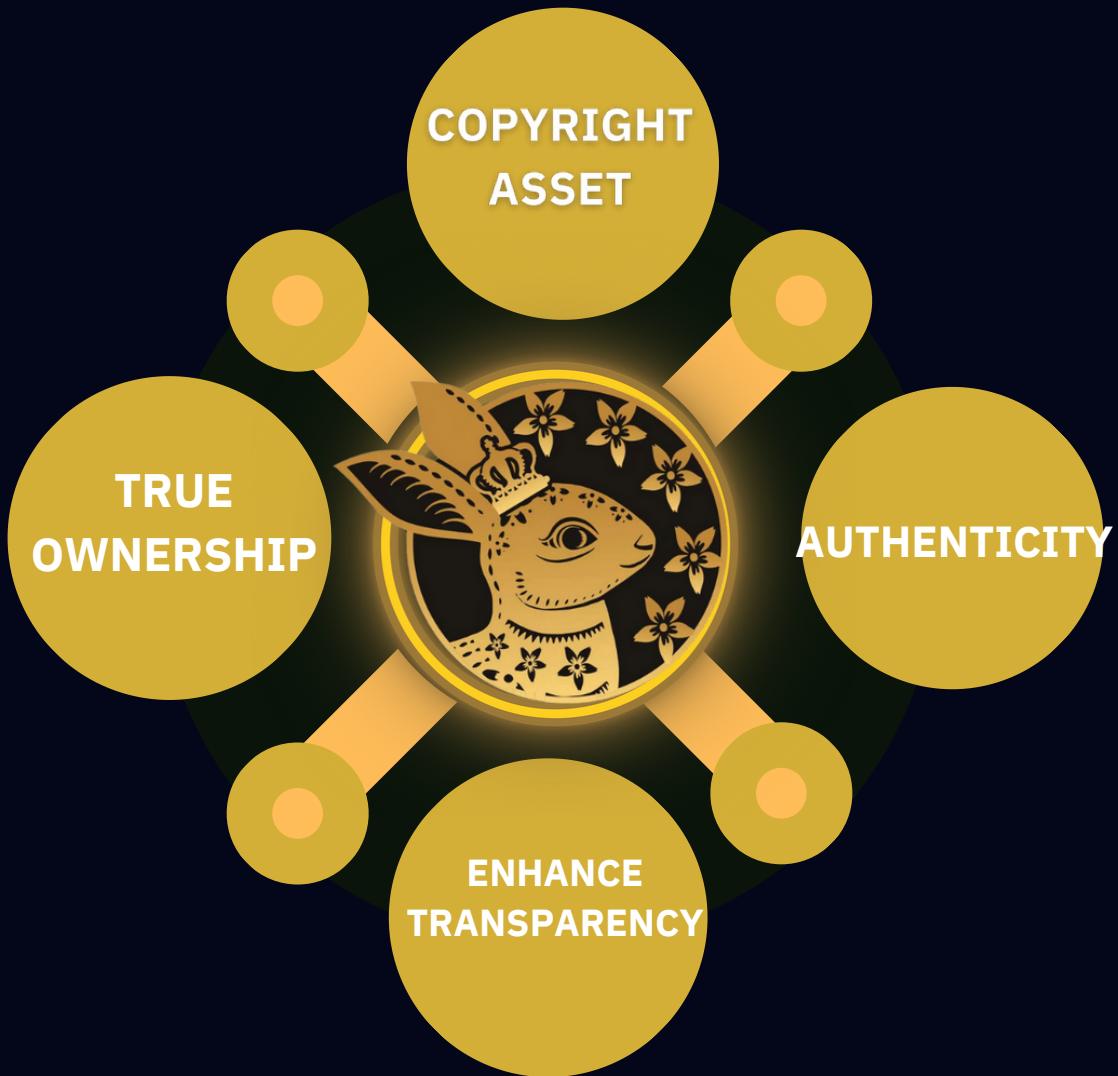

# WE ARE TRANSFORMING ENTIRE ECOLOGY!

In the crypto sector, concerns with transparency, verification, ownership, provenance, copyright, and forgery have long existed. Additionally, previously only the wealthy could afford to spend millions of dollars on a single asset in the crypto and assets market. On the other hand, it can overcome all social and economic divides and is certainly meant to be enjoyed by everyone.

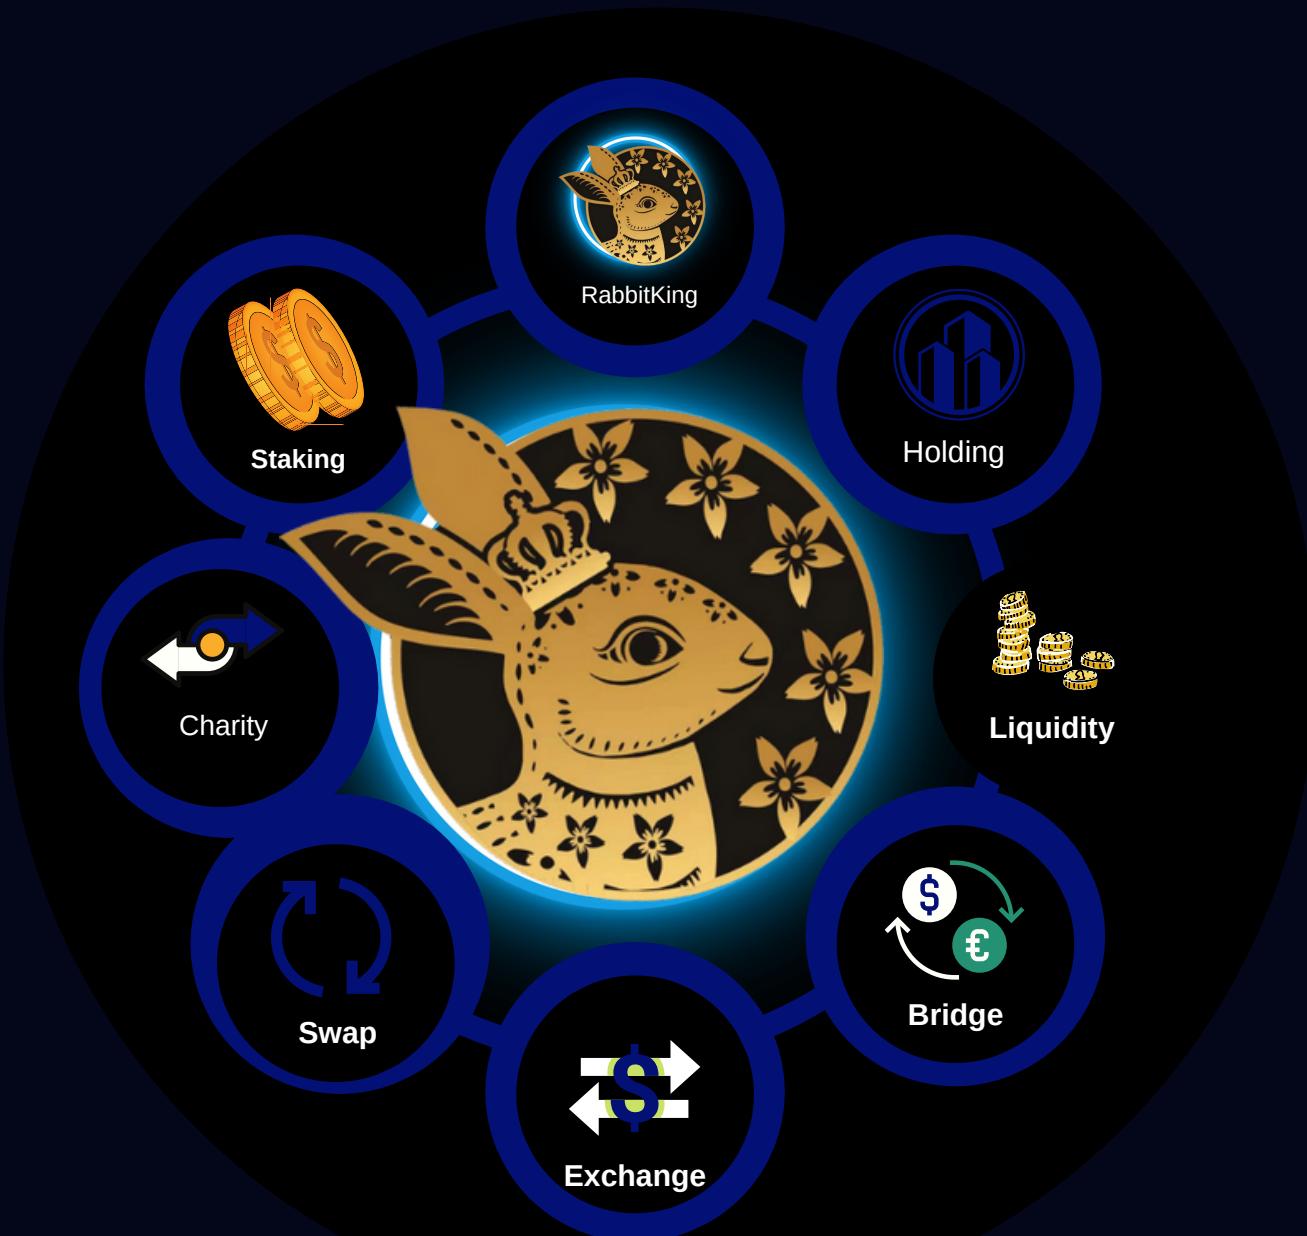

Fortunately, the problems mentioned above are almost eliminated with our intended ecosystem. And as of right now, the blockchain and cryptocurrency industries have developed and successfully used wonderful, sophisticated tokens. We are prepared for a change in the way RabbitKing TOKEN is bought, sold, advertised, supported, cherished, and even produced.

# EcoSystem

All of our investors receive royalties in exchange for their investments. Each item purchased by RabbitKing has a mysterious feature that allows the owner to obtain particular items in both the virtual and physical worlds. The unique things will eventually be revealed. In reality, gatherings are necessary. a location where RabbitKing holders can gather.

# FEATURES

## PROOF OF STAKE

The network allows participation from community users, ensuring a goes both ways and decentralised blockchain.

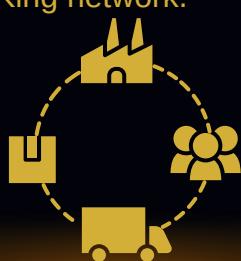

## DECENTRALISED GOVERNANCE

Members of the community (token holders) can submit proposals, assign authority, cast votes on blockchain-related issues and events, and participate in governance processes.

## CROSS-CHAIN COMPATIBILITY

By wrapping via the RabbitKing bridge and sending back to the RabbitKing network as needed, RabbitKing can be used with ease on the RabbitKing network.

## EVM COMPATIBLE

Existing smart contracts for Ethereum can be readily transferred to RabbitKing without requiring any additional modifications.

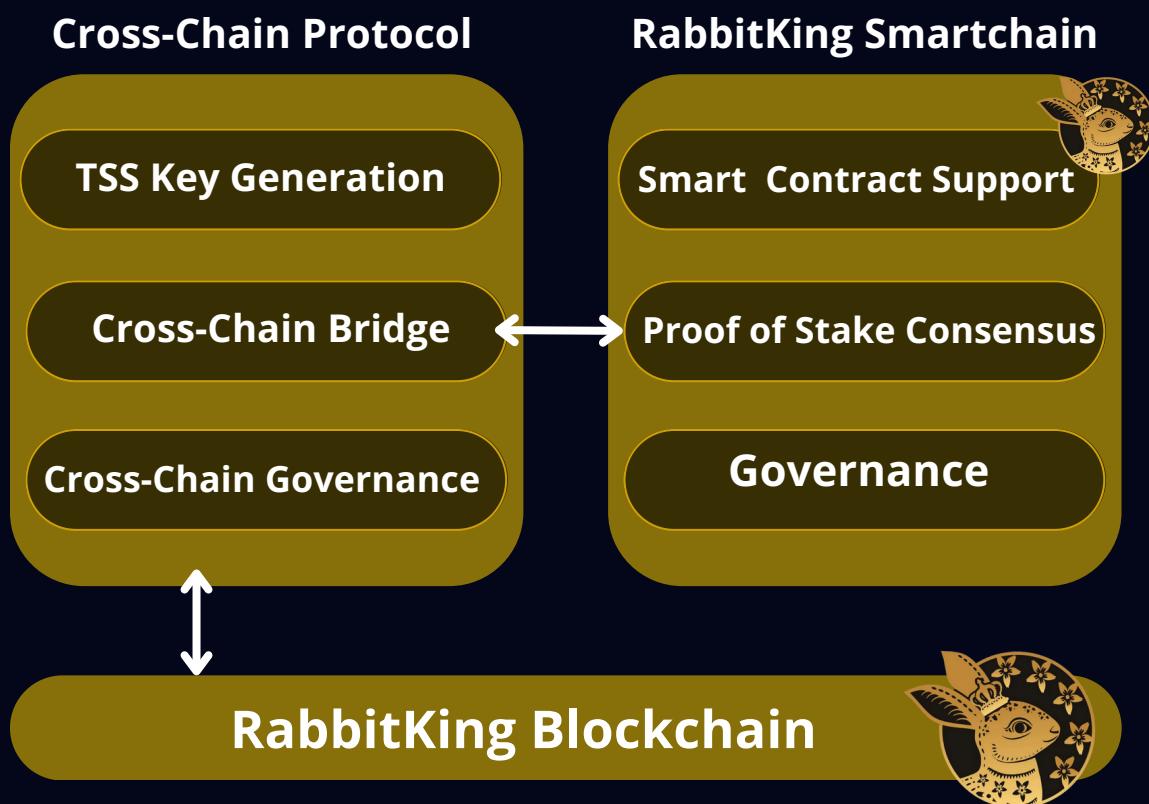

# CROSS-CHAIN PROTOCOL

The following are the cross-chain protocol's main characteristics:

- Support for decentralised and safe cross-chains
- A key generation method without trust for threshold signature schemes. Calculation of final signed transactions will be done using generated private shares of the signing key.
- To reduce the danger of a single point of failure, the community and outside partners will also handle the private key sharing (i.e., centralization).
- Organizations using the cross-chain protocol are supported in their ability to vote thanks to the protocol governance mechanism.

# RabbitKing HOLDING

In the meta world, owning "RabbitKing" is desirable because it creates rewards through exchange and passive revenue through the growth of the collection's overall value. A user can easily obtain their reward if they carry RabbitKing. As its holders' value grows, it is also the simplest way to generate passive income in a decentralised environment.

## SCALABILITY

RabbitKing token's larger transaction volumes and cheaper fees demonstrate how proof of stake methods provide better scalability.

## ECO-FRIENDLIER

One of the main advantages of staking with RabbitKing is that it eliminates the need for ongoing expenditures on pricey gear and electricity.

## HIGHLY SECURED

In comparison to rivals, \$RabbitKing offers a quick and reliable portal that is supported by our ecosystem.

# Secure Platform

## SECURE STORAGE

We store the vast majority of the digital assets in secure offline storage.

## PROTECTED BY SMART CONTRACT

All the tokens are stored on our wallets.

## TRANSPARENT

We are transparent platform where all your assets are secure and fully decentralized.

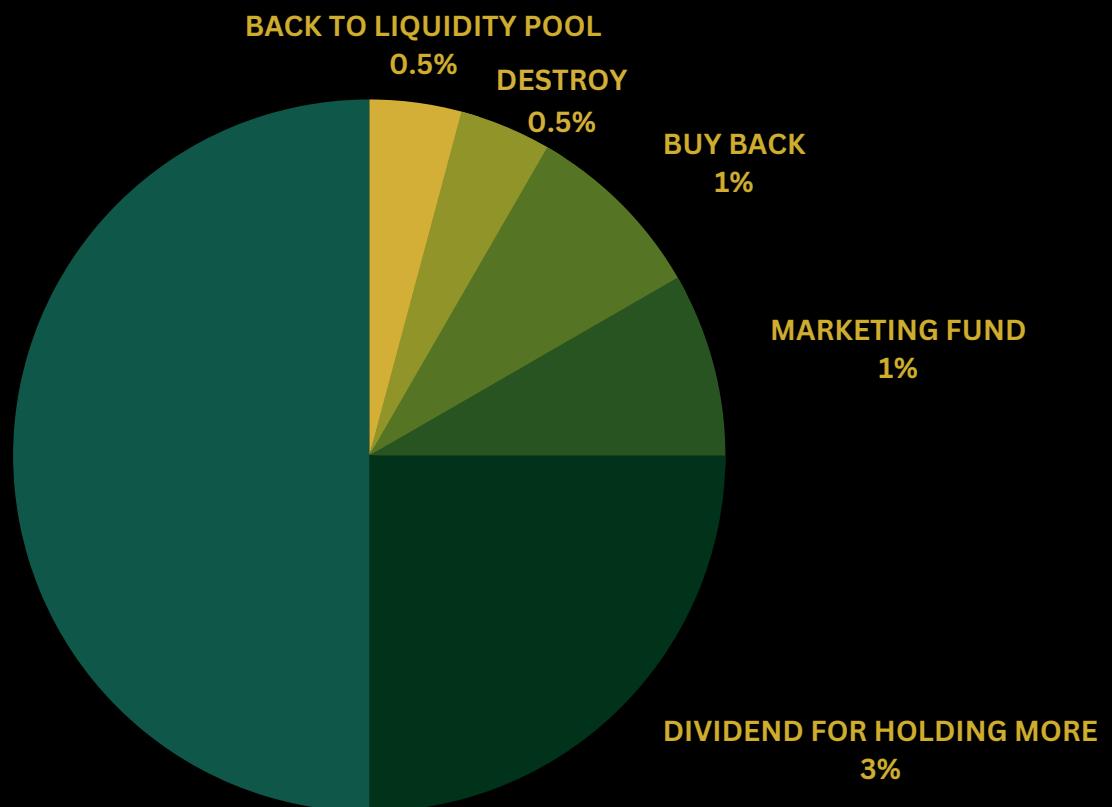

# Tokenomics

RabbitKing is a BEP-20 community token built on the Binance Smart Chain, with the transaction tax 6% (buy and sell)

To ensure the RabbitKing price can continue to surge,

- 0.5% of the buy/sell tax is automatically destroyed ,
- 0.5% of the buy/sell tax will contribute to liquidity pool,
- 1% of buy/sell tax will buy back RabbitKing,
- while there is 3% of buy/sell tax will distributed for RabbitKing holder holding more than 30 billion as holding dividend.

# What we have achieved

**Current community size: 34000 holder addresses**

**Communities distributed in 22 different countries listed by  
coinmooner, coinvote, coinscope,dextool score 99**

## PLAN

**Target: 100000 holders in Q3 2023**

**1000000 holders by Q4 2024**

**listing into exchanges when the holder addresses**

**achieving 1 million holder**

# ROADMAP

## Phase 1

- Development of the \$RabbitKing
- Building Rabbitking community, target achieve 3000 holders
- Getting a reliable audit on the coding.
- whitepaper launch

## Phase 2

- Ecology of Rabbitking launched
- Building a staking Dapp for the RabbitKing
- Get the word out of the token and its mission.
- building community
- 

## Phase 3

- Holding platform goes live
- Getting listed on exchanges.
- Work on building an user friendly DeFi platform.

## Phase 4

- More exchange listings
- Community giveaways/airdrops
- Unleash the true utility of the RabbitKing

# THANKS FROM THE TEAM

The RabbitKing wants to utterly disrupt everything with a novel strategy that blends a love of real estate with a passion for blockchain technology. We'll exert every effort to see that our roadmap and ambitions materialize and open up real estate investing to everyone.
